\* Some counties not shown separately to avoid disclosing individual operations. <sup>1</sup> These data provided are interpretations based on data collected from external sources and compiled by North Carolina State University. <sup>2</sup> Included total income from farm and commercial forestry as estimated by County Extension Agents. The portion from commercial forestry is not included in cash farm receipts from farm marketings. A different data collection technique was used in 2005, but the totals are comparable to previous years. <sup>3</sup> This estimate includes both commercial farm ponds and marine seafood. Trout and catfish income from commercial farm ponds was estimated by County Extension Agents. The income from seafood was based on dockside value of the commercial catch at the point of landing, as estimated by Marine Fishery Services, U.S. Department of Commerce, Beaufort, N.C. Sums may not equal totals to avoid disclosing individual operations.
